

GGS Sand Bag

GGS Sand Bag is a woven geotextile made of 100% High Tenacity polypropylene staple fibers that are woven to form a dimensionally stable network. The yarns that make the bags are white in color. GGS Sand Bags are designed to be used in Erosion Control applications. GGS Sand Bags resist ultraviolet deterioration, rotting, biological degradation, naturally encountered basics and acids. They come with a tie string to enclose the bag.

Property	Measure
Size	12" x 26"
Color	White
Material	100% Polypropylene
Top	Hemmed
Bottom	Single Fold and Stitch
UV Durability	70% after 1600 hrs
